W. H. MULLINS

SALEM, OHIO.

J. T. WAGNER, Sales Agent,
No. 108 CHAMBERS STREET, New York City.

oversize 70 CAR 1900 W. H. Mullins (Firm)

TO THE TRADE.

The catalogue of Finials and Stamped Sheet Metal Ornaments here presented is intended to give to the Carpenter and Builder a line of work particularly adapted to ornamentation on frame buildings. The stamped metal work shown in this catalogue can be used in a variety of combinations in the ornamentation of frame buildings, and will give to the Builder a means of ornamentation which will at once recommend itself as superior to carved wood work, or any other style heretofore in use.

I have an almost endless variety of ornaments adapted for architectural purposes, and solicit correspondence with all interested in this line of business. As stated on other pages of catalogue, the work shown is guaranteed superior to anything on the market. My factory is the largest in the country engaged in the stamping of architectural sheet metal work, my facilities are unequalled, and satisfaction is guaranteed.

I have other catalogues showing designs of galvanized iron cornices, window caps and building fronts, and will be pleased to send same on application.

Send in your drawings of special work at my expense for estimate, and they will be returned immediately with quotations free of all charge to parties sending them.

STAMPED ZINC CEILING CENTER PIECES.

Stamped sheet metal work, as used for Ceiling Center Pieces, possesses great advantage over the heavier and more expensive stucco and cast work, which will at once recommend it to those in want of ornamentation of this character.

The principal advantage claimed for Sheet Metal Center Pieces is the extremely low price at which they can be sold, beauty of finish, durability, lightness, the ease with which they can be put up, and the fact that they may be shipped without danger of breakage.

These Centers are all finished before leaving the factory, and painted a lustreless white to correspond with plaster finish of ceiling and are priced in this way. They can, however, be painted and ornamented to suit the taste of purchasers, and to correspond with style and decoration of room where used. These Centers are simply screwed to the ceiling after plastering is put on, and can at any time be taken down, cleaned and replaced without damage to the ceiling or Center Piece.

The prices given are for Center Pieces finished a beautiful white, ready to put up, and delivered, carefully boxed or crated, on cars at Salem. Necessary white-headed screws, together with a small vial of paint and hair pencil, will be furnished with each shipment of Center Pieces, to be used in retouching should they become soiled in fastening up.

Correspondence solicited. Always state whether work is to be sent by Express or Freight.

Complete Catalogue of Ceiling Center Pieces sent on application.

NEW DESIGNS OF CRESTING AND CRESTING BLOCKS.

The Crestings and Cresting Blocks shown herewith are entirely new and original in design, and are made of stamped crimped iron or zinc, being stamped in two plates, soldered or riveted together and shipped either separately as Cresting Blocks ready to be applied to the ordinary 2-inch ridge roll, or made up as Crestings, as shown in design No. 3726. These designs of Crestings and Cresting Blocks are intended to meet the requirements of the Contractor, Builder and Roofer for a cheap ornamental ridge cresting, and will be found to be the cheapest and most artistic cresting that has ever been offered to the trade. In using these Cresting Blocks it is not necessary that they should be soldered to the ridge roll, but simply slipped over the end of the roll before placing it in position on the roof, and after spacing them as required, nail through the lower flange to the ridge pole, using a small slender wire nail for this purpose. In using them in this way the nail used in fastening the Cresting Blocks also answers the purpose of holding the ridge roll in position on the roof, and does not necessarily add any additional nail holes other than would be used in applying ridging in the ordinary way.

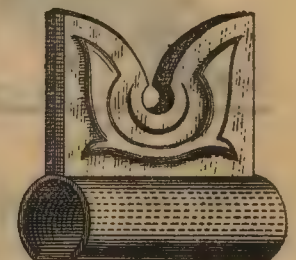

The Finials or Terminals shown on page 14 are used in connection with the Cresting and Cresting Blocks as Terminals on the end of Cresting.

The use of Sheet Metal Garlands will give the contractor and builder a new and very effective style of ornamenting and decorating frame buildings. Many of these Garlands may be used to advantage in forming a continuous running Garland, in frieze of wooden cornice, or can be used separately between brackets, or for a large variety of other uses, which will suggest themselves to the practical builder. As applied to frame buildings, they are simply tacked to the woodwork with round head, slender wire nails.

ROSETTES, LEAVES, ENRICHMENTS, ETC.

LEAVES—The Leaves here shown are intended for use on Brackets and Modillion Fronts and for numerous other uses which will suggest themselves to the Contractor and Builder.

STAMPED ZINC ENRICHMENTS—A very beautiful effect can be produced in making Wooden Cornices by ornamenting the Plain Mouldings with Stamped Zinc Enrichments, cuts of which are shown herewith. These Enrichments are simply tacked to the Wooden Moulding with small wire nails, and can be used in almost an endless variety of combinations for the uses mentioned.

CAPITALS.

Sheet Metal Capitals are much superior to Carved Wood or Capitals made in any other material, in that they are more durable, not liable to have the projecting points broken off, as in Wooden Capitals, and last, but not least, are cheaper than Wooden Capitals of corresponding style in ornamentation. They are priced either complete, ready to slip on the column, or in halves, to be used on columns already in place. They can be used on Wooden Columns, or when desired, I will be glad to quote prices and submit designs for Galvanized Iron Columns.
